

WMF 2022: Key messages Top 10 technologies

- 1. All electrification related technologies are needed to reach sustainable electrification at an acceptable performance, cost and time frame**
- 2. Detailed planning of technologies development along the full supply chain from mining to recycling will be crucial**
- 3. Financing of these technologies and their scale up will be essential but this might not be enough: political cooperation and sharing between the US, Europe and Japan will be vital.**
